QANIK
STATION

SMART RUBBER FOR RUGGED WINTERS

PROTECT YOUR FLEET AND YOUR EMPLOYEES

The Qanik Station snow and ice remover is at the cutting edge of technology. The secret? Bold engineering and sturdy rubber components. Qanik Station is the **only removal system that gets rid of snow and ice from trailer truck and box truck roofs.** You'll save a ton of time and money while ensuring the safety of your employees.

TO LEARN MORE, VISIT **QANIKSTATION.COM**

A LOAD OF BENEFITS FOR YOUR BUSINESS

ENSURES THE SAFETY OF THE DRIVER AND OTHER MOTORISTS

Since **drivers or employees don't have to climb onto the roof** to remove snow or ice, the risk of injury is greatly reduced.* With a clear roof, **the safety of other motorists is guaranteed** and the risk of fines is reduced.

*Section 498.1 of the Highway Safety Code.

DOUBLY EFFECTIVE AND FAST!

The station removes snow and ice at the same time using an ingenious patent-pending system. The vibrations of **30 star-shaped rubber rotators** loosen and break up the ice, while **20 rubber conveyor blades** remove the snow and ice by throwing it aside.

Qanik Station does the job **faster than waiting at a red light**—and that's for a 53-foot trailer!

A RELIABLE CHOICE FOR RUGGED WINTERS

The rubber used on Qanik Station components **retains its elasticity to -57 °C**. The components are sturdy and of superior quality—nothing is left to chance when it comes to battling snow, cold weather, freezing rain, and ice.

FULLY AUTOMATED

The system is fully automated so there is **no need for personnel.** Drivers can activate Qanik Station from the comfort of their truck.

PREVENTS DAMAGE TO TRAILER TRUCK ROOFS

All components in contact with the roof are made from **premium rubber**, and the roof remains protected because the floating module adjusts to irregularities to avoid damage to trailer truck roofs and all the associated costs.

A TURNKEY SOLUTION THAT'S EASY TO INSTALL

The station is **64 feet long x 16 feet wide x 23 feet high**. It only requires concrete blocks to secure it to the ground.†

Qanik Station is **delivered turnkey, and installation is extremely quick**.

†However, you do need to connect it to your electrical system and ensure that the ground is as flat as possible at the installation site.

FAST PROFITABILITY

Call us at **1-888-826-5955** or contact us by email at **rfq@produitshevea.com** for a custom quote.
